AmkaiSolutions[™] Announces Partnership with iSirona

Waterbury, CT ---October 13, 2010 --- ***AmkaiSolutions***[™] announced today that it has signed an agreement with iSirona, a provider of simplified solutions for medical device connectivity. Under the agreement, iSirona's connectivity technology will be available to ASCs and surgical hospitals that currently use or purchase AmkaiCharts.

Upon execution of the partnership, iSirona's connectivity solution will be embedded in AmkaiCharts—allowing users to simply connect medical devices to their existing hardware and network to record patient vitals and statistics from within AmkaiCharts. Not only will this functionality ensure that the data is documented to the correct patient, it will improve the speed and accuracy of data available for clinical decision-making.

AmkaiSolutions[™] CEO, Joe Macies, says the agreement with iSirona is in keeping with the goal of continuing to deliver innovative solutions to clients. "iSirona's technology allows us to eliminate the gap between having patient data at the device and having access to that data from within the patient record," he explains. "Making this functionality available provides us with an opportunity to help our clients further streamline their efforts and improve patient care. We believe this ability will be of great value to our customers."

iSirona's gateway for AmkaiCharts is planned for release later this month.

AmkaiSolutions[™] offers administrative systems through AmkaiOffice[™], EHR systems through AmkaiCharts[™], complete enterprise systems through AmkaiEnterprise[™], and specialty-specific software for GI, Pain, Orthopedic and Ophthalmology operations. Customers can acquire these solutions on a centrally hosted subscription plan called Amkai OnDemand[™] as well as via license acquisition.
